| | SD215 | 79.994792 | per unit | | | | | |

* Consolidated Rates include all portion amounts broken out in shaded area.

How do I determine which figures to use in calculating my Taxes?

- ~ Consult the latest Final Assessment Roll listing for your property. You will want to note the Fire District code, Lighting District code and any Water and/or Sewer District codes (and the number of units listed for the Water/Sewer districts).
 - ~ On the rate chart use the "Inside" figures if you are in the Village limits.
 - ~ Use the "Outside" figures if you are not in the Village limits and there are no Special District Codes
 - ~ All other properties will need to find the rate line that is correct for their Fire/Lighting districts.
 - ~*Note that not all properties with a Fire District will have a Lighting District also.
 - ~ Use the figures for any Water/Sewer Districts which may be applicable to your property. Most are a flat rate (per unit charge)
 - ~To calculate taxes, take the total assessed value of the property, divide by 1000, then multiply by the appropriate tax rate.
- Example - Owego property in fire district 002 and lighting district 002 with a total assessed value of \$120,000
- 120,000/1000 is 120, times tax rate of 21.723675 = \$2,606.84
